TOPTAN TEKSTİL PAZARLAMA

Concrete Mixer Truck

Optimized design of concrete mixing tank, improve loading ability, mixing on average without separation.

Mixing blade adopt three-dimensional double helix mixing design, reducing remnant rate to 0.6%, better than international standard 2%, leading the industry standard 0.7%-1%.

The blade has unique wear-resisting protection structure, improving blade service life 80%.

The hydraulic system are all adopted the world famous brand to keep sure the mixer truck has a perfect performance.

Accessories:

- Mudguard powder rubbers
- Hose locker and tool box
- Suction hose
- Couplin wrench
- Yellow beacon lamp
- Motopump
- Reel suck and pressing hoses
- Type : Wheel Mounted
- Concrete Capacity: 8m3

Model: HKN10

Concrete Mixture Truck HKN10

Chassis: We provide any type or any brand truck chassis as per customers requirement. Bessically water tanker fabrication on mounted of japnese brand and world famouse truck chassis. Chassis specification are depend on brand and model. Also we can provide RHD or LHD truck chassis as per customer demand.

Painting:

We have a robotic paint system and world class finishing. Customer can demand any basic color with world class finishing. Even we are specialist of UN color requirement.

Body Construction:

We can customized the super structue as per customer requirement and below is one of our standard water tanker body diamention for specific requirement

Brand	: HKN
Model	: HKN10
Country of origin	: Turkey
Country of Shipment	: Turkey
Nominal Capacity	: 8m3
Drum Volume	: 14m3
Effective Volume	: 10m3
Drum Diameter	: 2,100mm
Drum Speed	: 1-15rpm
Drum Length	: 6,080mm
Water tank	: 850L
Water Pump	: 650L
Chassis:	
Chassis Engine Power	: 310
Payload Capacity	: 25,000kg
Wheel Base	: 3,800mm
No. of Axle	: 3
Steering	: Right Hand Drive (RHD)
Overall dimension (L*W*H) (mm)	: 10000*2500*3950
Max rated speed(RPM)	: 2100
Hydraulic motor	: Rexroth
